

FSG 2022 – Deep Dive Topic – Combustion

Dear Formula Student Combustion Competitor,
Thank you for submitting your Pitch Video.

In recent years, international supply chains have come under increasing pressure. Low-cost manufacturing is no longer the sole driver in planning.

Please provide an overview of how this change is impacting your business and present a plan for using local supply chains to make yourself independent of geopolitical decisions and local impacts while remaining financially profitable.

Please include this topic in your 10-minutes pitch on August, 18th in Hockenheim.
We are looking forward to your presentation!
