Changelog

Rule	Version	Change
DE2.3.1	1.0	Change registration fee.
DE5.1	1.0	Update DBOM and CBOM.
DE6.1	1.0	Update Endurance running order procedure.
DE6.2	1.0	Add Trackdrive running order procedure.
DE6.3.2	1.0	Add Dynamic Area restrictions.
DE7.4.16	1.0	Adopted to mandatorily have a switch for Race mode.

Formula Student Germany DE **Competition Handbook 2023**

DF1 General Information

DE 1.1 Competition

DE1.1.1 There will be competitions for the Internal Combustion Engine Vehicle (CV) class and the Electric Vehicle (EV) class. These will take place at the same location during the same week, together with the additional Driverless Cup (DC).

DE 1.2 **Applicable Rules**

DE1.2.1 The competitions will be held in compliance with the "Formula Student Rules 2023".

DE 1.3 Competition Dates and Place

FSG 2023 will be held from 14th until 20th of August 2023 in Hockenheim, Ger-DE1.3.1 many.

DE1.4 Competition Website

The URL of the FSG competition website is https://www.formulastudent.de. DE1.4.1

DE1.5 Date and Time Format

- DE1.5.1 The competition date/time format is "YYYY-MM-DD hh:mm" according to ISO 8601¹.
- The competition time zone is Central European Time $(CET)^2$ or Central European DE1.5.2 Summer Time (CEST) from last Sunday of March to last Sunday of October, Europe/Berlin.
- DE1.5.3 The time of the competition website is the official time for all deadlines and decisions:

https://www.formulastudent.de/time.

DE 1.6 Pandemic Situation Handling

DE1.6.1 Due to the COVID-19 pandemic the actual execution of the event is subject to change. This document will be updated once new information becomes available.

¹https://en.wikipedia.org/wiki/ISO_8601 ²https://en.wikipedia.org/wiki/Central_European_Time

DE1.6.2 All team members should do a COVID self-test before arriving at the competition site.

DE 1.7 Vehicle Shipping

- DE1.7.1 Teams are advised to consult their shipping company or freight forwarder to ensure that their shipment fully complies with all relevant customs, import/export and aviation shipping requirements.
- Customs and other paperwork like ATA Carnet³, inspecting shipments as well as DE1.7.2 reporting and documenting damage of the shipment is the sole responsibility of the team.
- Detailed vehicle shipping procedures are published on the competition website. DE1.7.3
- Teams should upload their shipping documents to the competition website. DE1.7.4

DE 2 Registration

DE 2.1 Team Registration

- DE2.1.1 The team registration will take place in the form of a guiz. Registration without taking part in the quiz is not possible. There will be one quiz for all competitions. The guiz will require knowledge from all fields related to Formula Student.
- DE2.1.2 The URL of the registration website is https://reg.formulastudent.de. A test registration website is available at https://t.reg.formulastudent.de.
- DE2.1.3 Teams must create a team account on the competition website and assign a team captain and two deputies. The deadline for this is 24 h before the registration starts, see DE3.1. The team captain and his deputies may assign team members as participants simultaneously. Only one person (the team captain or one of his deputies) may complete the registration guiz.
- DE2.1.4 The guiz starts as defined in DE3.1.
- DE2.1.5 Only one question will be visible at a time and can only be answered once.
- Questions will have a fixed duration during which an answer has to be provided DE2.1.6 by the team.
- When entering the quiz late, depending on the delay, the first questions will not DE2.1.7 be visible anymore.
- DE2.1.8 Within teams with the same amount of correct guiz answers, the guiz result order will depend on the time needed for completion of the quiz. This time starts with the opening of the quiz for all teams (see DE3.1). Teams with less correct quiz answers will be sorted behind teams with more correct answers.
- Once the quiz has been successfully completed, the team captain or one of his DE2.1.9 deputies must register the team for the competition by agreeing to the rules and by selecting a free vehicle number. Requests for changing the vehicle number are only possible within 168 hours (7 days) after the start of the registration.
- DE2.1.10 The quiz will close after the time to answer the last question has expired.

³https://en.wikipedia.org/wiki/ATA_Carnet

EV CV vehicle numbers 001-199 201-399

- DE2.1.11 No feedback if the answer was correct will be provided until the results are published on Saturday 2023-01-28 13:00 CET on the registration quiz page, see DE2.1.4. After the results are published, teams have two hours to hand in protest until 2023-01-28 15:00 CET on https://www.formulastudent.de/fsg/feedback-quiz/. Protests by e-mail will be ignored. Quiz times and the resulting rankings will be published on Monday 2023-01-30 13:00 CET.
- DE2.1.12 Reserved slots, see DE2.2.2, will be assigned to the teams based on past achievements. All remaining and unused reserved slots will be assigned to all other teams, with regard to their quiz result.
- DE2.1.13 All assigned teams will be placed on the pending list on the competition website. In order to move to the participating list, they have 72 h to pay the registration fee, see DE2.3. Once all slots have been filled, all additional teams will be placed on a waiting list (see DE2.4). The period to pay the registration fee starts 2023-01-30 18:00 CET.
- DE2.1.14 The technical inspection order at the competition will be based on the quiz result in the respective class.

DE 2.2 Registration Slots

- DE2.2.1 FSG 2023 is limited in total to 30 CV slots and 70 EV slots. Up to 30 of the registered teams may participate in the DC.
- DE2.2.2 Reserved slots for the CV and EV class will be assigned to the following teams:
 - Three top CV and three top EV teams from FSG 2022
 - Five top DC teams from FSG 2022
 - Five top CV and five top EV teams from latest World Ranking Lists⁴

The top team slots will be assigned in the above order. Duplicate teams will be filled up with the next team from the respective category.

DE2.2.3 All remaining and unused reserved slots will become available for all other teams after the registration quiz has been closed on the registration website (see DE2.1.10).

DE 2.3 Registration Fee

- DE2.3.1 The registration fee is $1500 \in$ and includes a 15-person team. More team members can be registered for $50 \in$ per participant until the TMD deadline (see DE3.2). Team members may register after this deadline for a fee of $100 \in$ per participant. There is no limit in team size and no deadline for late bookings.
- DE2.3.2 The registration fee must be paid online within 72 h by a verified PayPal account after the team has been moved to the pending list in order to move to the participating list. Otherwise the team will be de-registered.
- DE2.3.3 Registration fees are only refundable should unexpected entry restrictions prohibit the team from travelling.

⁴https://fs-world.org

DE 2.4 Waiting List & Withdrawals

- DE2.4.1 Teams on the waiting list may move to the participating list until 2023-07-31 13:00 CEST. This is possible if registered team withdraw from the competition. Once a slot on the participating list has become available again, the next team on the waiting list will move to the pending list and has 72 h to pay the registration fee in order to move to the participating list.
- DE2.4.2 Teams on the waiting list are required to submit all documents and forms by the same deadlines as teams on the participating list.
- DE2.4.3 Teams on the waiting and participating lists who find that they will not be able to attend the competition are requested to officially withdraw by notifying the officials.

DE 2.5 No Driverless Events

- DE2.5.1 Teams that do not intend to run in autonomous mode at the competition must set the status "No Driverless Events" on the competition settings page. This cannot be undone. All driverless events will be scored with 0 points. The team will not be allowed to run in autonomous mode.
- DE2.5.2 Teams with the status "No Driverless Events" are not required to upload the ASF, ASRQ and the DBC file. Therefore, if these deadlines are missed, the team will not be withdrawn from the competition. All correction request for these deadlines become invalid immediately. Existing penalties remain if the status "No Driverless Events" is handed in after a deadline already expired.

DE 2.6 Driverless Cup (DC)

- DE2.6.1 All teams must decide on the competition settings page by the DCPI deadline whether they wish to participate in the Driverless Cup (DC).
- DE2.6.2 Up to 30 DC slots will be assigned among these teams. Five slots are reserved for the five top teams from FSG 2022 DC competition, the remaining slots will be assigned in the order of the quiz results.

DE 2.7 Team Member Designation (TMD)

- DE2.7.1 Participating team members must be assigned prior to the competition by the team captain or his deputies.
- DE2.7.2 If there are any team members who are studying at a different university, they must choose the team's university during their registration process as a team member.
- DE2.7.3 Team members may only be selected as participants by the team captain, if they have entered the following personal information in their user profiles:
 - Personal address
 - Clothing size
 - Valid Health Insurance Certificate (HIC) for Germany (e.g. travel insurance)
 - FSG standard terms
- DE2.7.4 As proof of valid health insurance in Germany the following documents are accepted (English or German language only):

- For members of any EU/EWR country: the backside of their European Health Insurance Card (EHIC).
- For all other (non EU/EWR or private health insurance): a DIN A4 PDF containing the member's full name, date of birth, validity date, clear statement that insurance is valid in Germany during the time of the event.

Team members have three attempts to upload a correct HIC. Ignoring the reviewer's comments more than twice will lead to an irrevocable fail.

DE2.7.5 The submission of the signed standard terms will be handled digitally. All participants will find personalized standard terms in the **My Account** section on the FSG homepage. This document must be signed and then uploaded using the standard terms upload in the **My Account** section.

DE 2.8 Visa for Participants

- DE2.8.1 All participants which passed the HIC-check, will find a personalized letter of invitation with a digital signature in their account overview.
- DE2.8.2 An invitation letter with a hand signature can be ordered on the competition website. Once a fee of $90 \in$ has been paid, the letter will be sent out within two weeks.

DE3 Important Dates

DE 3.1 Team Registration

DE3.1.1 Team registration (see DE2.1) for all teams starts on 2023-01-27 13:00 CET with the registration quiz and ends after the registration quiz has been closed (see DE2.1.10).

DE 3.2 Deadlines

- DE3.2.1 All required documents and information must be uploaded to the competition website by the team captain and/or his/her deputies by the deadlines as stated in Table 2.
- DE3.2.2 All documents must comply with a maximum size of 40 MB.

DE4 Competition Site Organization

DE 4.1 On-Site Registration

- DE4.1.1 Each team will be assigned a time slot for registering on-site.
- DE4.1.2 On Monday the on-site registration will take place near the south stands. On Tuesday the on-site registration will take place at the ticket center near the main entrance.
- DE4.1.3 Until Tuesday 2023-08-15 15:30 CEST teams are limited to have only 7 members on-site.

Table 2: Document deadlines

* The ASF, ASRQ and final dbc file upload is not required for teams that have selected the No Driverless Events status, see DE2.5.

- DE4.1.4 Until Tuesday 2023-08-15 15:30 CEST there is a no-go area in effect. Details can be found in the map published on the competition website.
- DE4.1.5 The team captain will be handed the tickets of his/her team members and all other required documents for entering the venue.
- DE4.1.6 Tickets will only be handed out for team members with complete profiles on the FSG Homepage.
- DE4.1.7 All questions regarding the registration procedure must be asked via the event helpdesk on the FSG Website⁵.
- DE4.1.8 The team must enter the competition site for unloading immediately after receiving their tickets and documents.

DE 4.2 Entering the Competition Site

- DE4.2.1 A pink "team truck" entrance pass with a green "unload card" attached to it is handed to each team at the registration. This entrance pass must be filled out completely and displayed behind the windscreen of the "team truck" used to transport the competition vehicle and equipment to the pits.
- DE4.2.2 The driver may queue the "team truck" only after the entrance passes are filled out.

⁵https://fsg.one/questions

- DE4.2.3 The total length of the "team truck" including a possible trailer must not exceed 12 m.
- DE4.2.4 The team is entitled to enter the competition site only once with their "team truck" for a maximum of 30 min for the purpose of unloading their competition vehicle and equipment.
- DE4.2.5 Afterwards the "team truck" must be moved outside of the Hockenheimring.
- DE4.2.6 It is not possible to drive to the pit area again with the "team truck" during the event before loading on Sunday.
- DE4.2.7 On Sunday 2023-08-20 the team is entitled to enter the pits once with the "team truck" for a maximum of 30 min for the purpose of loading.
- DE4.2.8 On request, teams may receive an additional yellow entrance pass that allows one passenger vehicle to enter the pit area for the next hour. These passes are only given out from Wednesday 2023-08-16 until Sunday 2023-08-20 11:00 CEST.

DE 4.3 Announcements

DE4.3.1 All announcements can be found on the competition website https://today.formulastudent.de/.

DE 4.4 Competition Site

- DE4.4.1 The use of motorcycles, quads, bicycles, scooters, skateboards or other similar mobility devices as well as self-propelled devices in general by team members and spectators is prohibited.
- DE4.4.2 Lost & found items must be picked up until Sunday 2023-08-20 18:00 CEST at event control.
- DE4.4.3 Confiscated goods must be picked up until Sunday 2023-08-20 18:00 CEST at a place to be announced. Confiscated items that are not picked up in time will not be kept.

DE 4.5 Welding

- DE4.5.1 FSG provides an approved welder. Outside of the opening hours it is possible to weld with own equipment in the welding area only, using appropriate safety gear.
- DE 4.6 Tyres
- DE4.6.1 FSG provides a tyre changing service.

DE 4.7 Fuel Station

- DE4.7.1 Open fuel containers are not permitted at the event.
- DE4.7.2 All fuel containers must be DOT approved.
- DE4.7.3 Refueling is only allowed at the fuel station.
- DE4.7.4 Waste oil is to be taken to the fuel station for disposal.

FSG Competition Handbook 2023

DE 4.8 [CV ONLY] Engine Test Area

DE4.8.1 Engines may only be run in the designated engine test area during the opening times and only after passing the tilt test.

DE 4.9 Team Briefing (A 6.3)

- DE4.9.1 There will be no on-site team briefings.
- DE4.9.2 Slides with information for the upcoming day will be published on the competition website on the evening before.

DE 4.10 Driver Registration

DE4.10.1 Driver registration will take place during the egress tests in the pits. All drivers must have their government issued driver's license and national ID card as well as their student ID ready for inspection.

DE 4.11 Technical Inspection Time Schedule

DE4.11.1 The technical inspection parts pre-inspection, accumulator inspection, mechanical inspection, electrical inspection and driverless inspection will be conducted within a strict time schedule where every team will get a predesignated time slot based on the registration quiz order. The time schedule will be published on the website shortly before the start of the competition.

DE 4.12 Transponders / Timekeeping

DE4.12.1 In order to have the car be identifiable during dynamic disciplines, Timekeeping will stick three RFID tags to the car. There will be one tag on the front, center and rear of the vehicle. They will all be on the left side (as shown in figure 1).

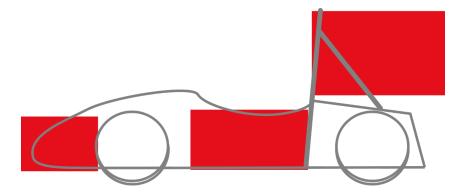

Figure 1: RFID Tag Placement Areas

- DE4.12.2 The location of the tags is decided by the officials. Areas where the driver will touch to get in or out and any sponsorship sticker will be avoided if possible.
- DE4.12.3 The area on the car will be cleaned (regular window cleaner) to apply velcro tape to mount RFID tags.
- DE4.12.4 If an RFID tag gets damaged, please contact Event Control. This will not result in a penalty.

- DE4.12.5 The RFID tags must not be fixed in any other way than done by the officials initially. This especially includes safety wiring or tape, as both interfere with the detection of the tags. In the unlikely event that a tag loosens from its mounting, this will never be treated as the team's fault.
- DE4.12.6 After the competition, these tags must be returned to the event control by Sunday, 2023-08-20 18:00 CEST.
- DE4.12.7 Live-timing is provided at https://tk.formulastudent.de. The shown data is unofficial.

DE 4.13 [EV ONLY] Charging

- DE4.13.1 The charging area is a separated dynamic area including separate entrance restrictions.
- DE4.13.2 Only three members per team may enter the charging area at the same time. One of them must be a Electrical System Officer (ESO) or Autonomous System Responsible (ASR), respectively.
- DE4.13.3 Inside the charging area, team members must not wear any conductive jewelry and must not wear any conductive objects of any kind which could touch the accumulator.
- DE4.13.4 400 V, 50 Hz, 3-phase CEE charging connectors (3L+N+PE 6h) with 16 A and 32 A as well as 230 V, 50 Hz, 1-phase CEE 7/3 "Schuko" are available in the charing area.
- DE 4.14 [EV ONLY] Accumulator Inspection
- DE4.14.1 The initial accumulator inspection will take place in the technical inspection tent. Any required re-inspection from Tuesday 2023-08-15 and later will take place in the accumulator tent.
- DE4.14.2 All teams that are allowed to enter on Monday 2023-08-14 and don't have their accumulator inspection on Monday must bring their accumulators to the accumulator tent by 20:00 CEST that day. All teams that have their accumulator inspection on the same day of entering bring their accumulators directly to the accumulator inspection.
- DE4.14.3 If a team misses the aforementioned deadline, a penalty of 10 points is deducted of its overall score for every commenced 12 hours up to a maximum total of 30 penalty points.
- DE4.14.4 The team has to register the accumulator delivery at the accumulator tent.

DE5 Static Events

DE 5.1 Detailed Bill of Material (DBOM)

DE5.1.1 For FSG 2023 a DBOM (see S2.5) for the "Engine and Drivetrain" must be submitted.

FSG Competition Handbook 2023

DE 5.2 Costed Bill of Material (CBOM)

DE5.2.1 For FSG 2023 a CBOM (see S2.6) for the "Brake and Steering System" must be submitted.

DE6 Dynamic Events

DE 6.1 Endurance Running Order

- DE6.1.1 The running order for the endurance according to D7.3 will be published before the start of the endurance.
- DE6.1.2 The running order is divided into different sessions.
- DE6.1.3 At least the five next vehicles according to the running order must queue up at any time during the endurance.
- DE6.1.4 The queue must be continuously filled up by the following vehicles.
- DE6.1.5 When the queue runs empty (i.e. there is no vehicle in the queue), the session is finished, even if not all vehicles from this session have been running yet.
- DE6.1.6 A vehicle is defined as running out of order and penalized according to D9.2.1 if it is missing from the queue. I.e. if there is at least one vehicle within the first 5 positions in the queue that has a later running order place or is running out of order as well.
- DE6.1.7 Running out of order is only possible at the end of the originally allocated session. There is no out of order running in or after the final session.

DE 6.2 Trackdrive Running Order

- DE6.2.1 The running order for the trackdrive according to D8.2 will be published before the start of the trackdrive.
- DE6.2.2 At least the three next vehicles according to the running order must queue up at any time during the trackdrive.
- DE6.2.3 The queue must be continuously filled up by the following vehicles.
- DE6.2.4 When the queue runs empty (i.e. there is no vehicle in the queue), the trackdrive is finished, even if not all vehicles have been running yet.
- DE6.2.5 A vehicle is defined as running out of order and penalized by one minute if it is missing from the queue. I.e. if there is at least one vehicle within the first 3 positions in the queue that has a later running order place or is running out of order as well.
- DE6.2.6 Running out of order is only possible at the end of the trackdrive.

DE 6.3 Behaviour Inside Dynamic Area

- DE6.3.1 Within the dynamic area, equipment that cannot be carried handheld by one team member, such as tool trolleys, jacks, etc., is only allowed in the inspection and preparation areas and not in the dynamic event queues.
- DE6.3.2 As soon as the vehicle moves under its own power, all associated team members within the dynamic area, with the exception of the ASR, must wait in a desig-

nated area until the run is finished. After the run, the vehicle must be collected immediately at the exit by two team members and the push bar.

DE6.4 Driverless Events Track Marking

- DE6.4.1 The markings of all dynamic events will have the following characteristics:
 - The track is marked with cones.
 - The left borders of the track are marked with small blue cones.
 - The right borders of the track are marked with small yellow cones.
 - Exit and entry lanes are marked with small orange cones.
 - Big orange cones will be placed before and after start, finish and timekeeping lines.
 - If not defined otherwise in chapter D of the rules, the maximum distance between two cones in driving direction is 5 m. In corners, the distance between the cones is smaller for a better indication.
 - The start, finish and timekeeping lines as well as keep out zones around the timekeeping equipment are marked with red, orange or pink paint.
 - Additionally for skid pad and trackdrive, track limit lines on either side of the track and entry/exit lanes may be marked with yellow, green or white paint.
 - There are no track limit lines for acceleration and Emergency Brake System (EBS)-test.
- DE6.4.2 All lines are spray painted with the chalk-based marking paint "Soppec - Tempo T.P."⁶.
- DE6.4.3 The cones used at the competition are equal to the cones listed in Table 3 despite that there will be letters "FSG" on the black/white band of the cones (white/black respectively).
- DE6.4.4 The manufacturer WEMAS⁷ does not sell the cones to end customers, but they may be purchased from baustellenabsicherung $24.de^8$.

FSG Competition Handbook 2023

- DE6.4.5 There are the following limitations mainly resulting from the Hockenheim track conditions and organizational/authorizational issues:
 - The lines may not be perfectly and continuously drawn.
 - There may be further markings, to those mentioned above, that are not part of the track (e.g. markings, including cone position markings, lines from other events or different colored surface, etc.) on or close to the track which will not be removed by the officials.
 - There may be (stacked) spare cones standing at the trackside at distinguishable distance.
 - There is time keeping equipment next to the track that could be recognised as cone.
 - No special artificial landmarks are provided by officials. The team must not place additional landmarks on the track or inside the dynamic area.
 - No map data is provided by the officials.
- DE6.4.6 Figures 2, 3 and 4 visualize the track layout descriptions given in D4.3, D5.1, and D8.1.

DE7 Vehicle Requirements and Restrictions

DE 7.1 Technical Inspection Sticker (IN 1.3)

DE7.1.1 For the competition technical inspection sticker, a space 50 mm tall \times 180 mm wide must be made available on the nose of the vehicle directly in front of the cockpit opening.

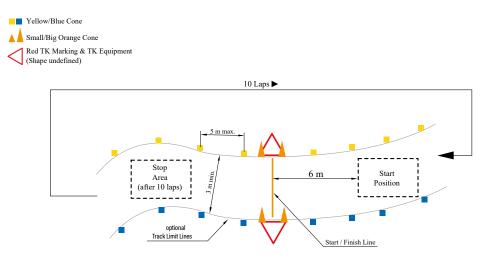

Figure 3: Trackdrive

DE 7.2 [EV ONLY] Cell Temperature Monitoring Device (CTMD) (EV 5.8.6)

DE7.2.1 [EV ONLY] The temperature measuring device DS1922T-F5 (iButton) will be provided by the officials and must be installed by the team. It is recommended to use an iButton holder (DS9093S) for mounting.

DE 7.3 Data Logger (EV 4.6 and T 14.2)

- DE7.3.1 A Data Logger (DL) described in the additionally published document "Data Logger Specification" will be mounted to the vehicle.
- DE7.3.2 The communication described in section DE7.4.9 must be traceable in the logs.
- DE7.3.3 Beside Remote Emergency System (RES) messages (see DE7.4.9), the messages defined in Table 4 must be provided to the DL with a cycle time of 100 ms each. Steering angle δ and vehicle coordinate system is defined in figure 5.
- DE7.3.4 All signals are little-endian (Intel). Scale, if not defined, is 1.
- DE7.3.5 Messages 0x500 and 0x502 must be filled in any case. If some values are not directly available, they should be interpolated or calculated (i.e. target values). 0x501 depends on available sensor data.
- DE7.3.6 All signals mentioned in the team's Autonomous System Form (ASF) have to be provided within the up to five messages with CAN-IDs 0x511 to 0x515. Each message can be up to 8 B of data length. Cycle time is 100 ms.
- DE7.3.7 A valid dbc⁹ file containing the message definition of the ASF messages must be uploaded with the ASF. It may be updated afterwards until the deadline mentioned in 2.

⁹see https://fsg.one/dbc_format for more informations

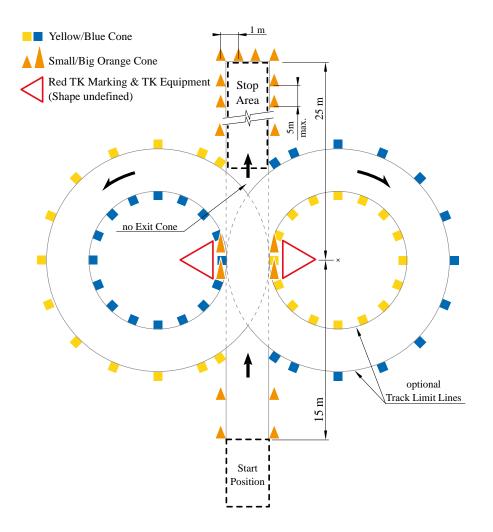

Figure 4: Skidpad base configuration according to rule D4.3

DE7.4 Remote Emergency System (RES) (T14.3)

- DE7.4.1 The RES that has to be used for the competition is a GF2000i-codec/T53R98 combination from Gross-Funk GmbH¹⁰.
- DE7.4.2 All RES must be of the latest 2022 hardware revision (with E-Key). Older models must be sent in to Gross-Funk in order to be upgraded. Details regarding the upgrade procedure will be published later on.
 - SIL3 (EN61508) certified
 - EMV certified
 - communication in 430 MHz to 440 MHz band
 - increased signal strength of 88 mW
 - 12V to 24V supply voltage (0.26A @12V)
 - 450 g, 173 mm × 113 mm × 35 mm
 - IP20 (receiver) / IP65 (sender)

Table 4: Message definition of logged general DV data

- DE7.4.3 Please contact Mr. Keller (christian.keller@grossfunk.de) at Gross-Funk for purchasing.
- DE7.4.4 Regarding the increased signal strength, the BNetzA registration for Hockenheim will be provided by the officials.
- DE7.4.5 The receiver includes a normally-open (NO) relay which must be part of shutdown circuit. It opens on switching shutdown, on signal loss, and on power loss. Maximum current rating is 4 A.
- DE7.4.6 The CANopen interface of the receiver has the following properties:
 - 1000 kbit/s, 125 kbit/s, 250 kbit/s and 500 kbit/s in standard configuration.
 - Cyclic PDOs containing states of switches (Go-signal) and radio
 - Warns if signal loss detected (200 ms in advance to shutdown, contained in cyclic PDO)

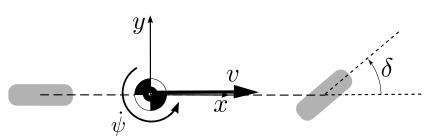

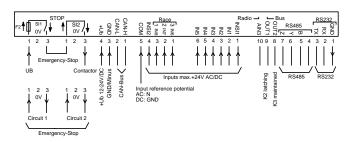

Figure 5: Bicycle model defining steering angle δ (drawn in positive direction after "ISO 8855" coordinate system \Rightarrow z up) and speed v.

Figure 6: RES sender & receiver

- DE7.4.7 The Node-ID and baud rate settings of the vehicle-side installed receiver can be configured with the external DIP switch:
- DE7.4.8 The Node-ID has to be set to 0x011 at the competition. Only in severe cases, there will be an exception. Please give a detail problem description with the request.
- DE7.4.9 The receiver is booted up and sends a message to signalize its initialization (NMT message with CAN-ID 0x700 + Node-ID and a single data byte 0x00). A CAN/CANopen master device must set the receiver to operational mode (NMT message CAN-ID = 0x000, byte 0 = 0x01 (requested state), byte 1 = addressed Node-ID or 0x00 for all). After setting to operational mode, the receiver starts

FSG Competition Handbook 2023

DIP SW	1	2	3	4	5	6	7	8	Baud Rate
Node-ID	+1	+2	+4	+8	+16	+32	0	0	1 Mbit/s
Bit	0	1	2	3	4	5	1	0	125 kbit/s
							0	1	250 ^{kbit} /s 500 ^{kbit} /s
							1	1	500 ^{kbit} /s
Node-ID						Ba	aud Rate		

Table 5: DIP switch configuration RES.

sending a status message of 8 bytes containing PDOs 2000 - 2007 (one byte each, CAN-ID = 0x180 + Node-ID) every 30 ms.

- DE7.4.10 Manually resetting the RES before sending the operational mode message may be used to check if the device is online (NMT message CAN-ID = 0x000, byte 1 = 0x80 (requested state), byte 2 = adressed Node-ID). This will be answered with the boot-up message.
- DE7.4.11 Beside the CAN-IDs mentioned in DE7.4.9 and DE7.4.10, be aware not to use the CANopen-related IDs listed in Table 6 on the bus¹¹.

Communication object	CAN-ID	Slave nodes
NMT node control	0x000	Receive only
Sync	0x080	Receive only
Emergency	0x080 + Node-ID	Transmit
TimeStamp	0x100	Receive only
PDO	0x180 + Node-ID	1. Transmit PDO
	0x200 + Node-ID	1. Receive PDO
SDO	0x580 + Node-ID	Transmit
	0x600 + Node-ID	Receive
NMT node monitoring	0x700 + Node-ID	Transmit
LSS	0x7E4	Transmit
	0x7E5	Receive

Table 6: Reserved message IDs for RES.

- DE7.4.12 System misbehavior and faulty logs caused by misuse of these messages eliminates the demand for a re-run and may lead to a Disqualified (DQ). Same counts for any kind of hardware manipulation to the sender and receiver or improper antennas modifications. In doubt, the logs available on the official DL (see Section DE7.3) count.
- DE7.4.13 The status of the switch (K2) and the button (K3) at the sender is contained in the PDO 2000 (bit 1 and 2) as well as on the digital outputs, see Figure 7. The E-Stop is signalized by PDO 2000 bit 0 and PDO 2003 bit 7. PDO 2006 contains the radio quality (0% to 100%) whereas PDO 2007 summarizes several radio states, i.e. the pre-alarm radio communication interruption (bit 6, 200 ms in advance to shutdown).
- DE7.4.14 Either K2 or K3 are allowed to be used to signalize the Go-signal for switching from "Ready" to "Driving" state, see T14.9, Figure 17. Both the CAN message or the digital outs can be used.
- DE7.4.15 For dynamic disciplines, the officials will hand-out a Race E-Key that has to replace the team's Training E-Key for the time of the run (switching the RES to

¹¹https://www.can-cia.org/fileadmin/resources/documents/brochures/co_poster.pdf

a different set of frequencies within the range listed in DE7.4.2). It must be returned to the officials immediately after the run has been finished.

DE7.4.16 In order to enable the Race E-Key frequencies at the receiver, the input "Race 1" has to be set to high (by bridging the input with supply "+Ub"). That needs to be done upon receival of the E-Key with a switch in proximity to the master switches (see T11.2). Race mode position has to be marked with an "R". Correct mode selection can be traced via the input's LED as well as in PDO 2007, bit 7.
